Issue Date: 06 MAR 2015

Subject: Regulatory Declaration and/or Product Stewardship Information Statement(s) - Request

Dear Sir/Madam:

In response to your request, please find enclosed the regulatory declaration and/or product stewardship information statement(s) for the following product(s):

EXXONMOBIL PP1304E3
EXXONMOBIL PP1304E4

These statements are provided by or on behalf of the above referenced ExxonMobil selling affiliate.

If you have any questions or need additional information please contact your ExxonMobil sales representative.

Enclosure(s):

EXXONMOBIL PP1304E3 - ROHS
EXXONMOBIL PP1304E3 - REACH CANDIDATE LIST
EXXONMOBIL PP1304E4 - ROHS
EXXONMOBIL PP1304E4 - REACH CANDIDATE LIST
Reference Number: 0192086

STATEMENT

Issue Date: 06 MAR 2015
At request of:
Product Name(s): EXXONMOBIL PP1304E3
Material Code(s): 5214928

With regard to the compliance status of the ExxonMobil Chemical product referenced above with the regulation(s) identified below the following can be declared:

This product is in compliance with the relevant heavy metals and flame retardant requirements of the following regulation:

Directive 2011/65/EU of the European Parliament and of the Council of 8 June 2011 on the restriction of the use of certain hazardous substances in electrical and electronic equipment (EEE), as amended up to Commission Delegated Directive 2012/51/EU of 10 October 2012.

The concentrations of the following heavy metals (lead, cadmium, mercury & hexavalent chromium) and flame retardants [polybrominated biphenyls (PBBs) & polybrominated diphenyl ethers (PBDEs)] in this product do not exceed 0.1% by weight for lead, mercury, hexavalent chromium, PBBs, & PBDEs and 0.01% by weight for cadmium. Trace levels of these substances may be present resulting from the specific characteristics of the raw materials and/or of the manufacturing process.

VALIDITY DATE: This document is valid until the next relevant legislative and/or regulatory change with a maximum of one year as of the date of issue of the statement.

Reference Number: 0192086

STATEMENT

Issue Date: 06 MAR 2015
At request of:
Product Name(s): EXXONMOBIL PP1304E3
Material Code(s): 5214928

With regard to the compliance of the ExxonMobil Chemical product referenced above with the regulation(s) identified below, the following can be declared:

Candidate List of Substances for Eventual Inclusion in Authorisation Process

On December 17, 2014 the European Chemicals Agency (ECHA) has added 6 substances to the Candidate list of substances for eventual inclusion on the Annex XIV List of Substances subject to Authorisation on its website. This brings the total number of Substances of Very High Concern (SVHC) on the Candidate List to 161.

Following ECHA's publication of the inclusion of an SVHC in the Candidate List according to Article 59(1) of REACH, additional information requirements may apply.
They are based on the Article 31 (Safety Data Sheets) and on the Article 33 (Substances in articles) of REACH (see Note 1).

According to our records, the above ExxonMobil product when supplied by ExxonMobil in EU Member States and EEA countries DOES NOT contain a Candidate List substance that triggers an additional action (see Note 2).

Any candidate list substance identified as being present in ExxonMobil products will be identified in the relevant sections of the EU Safety Data Sheet. The above ExxonMobil product does not contain candidate list substances at levels triggering obligations under REACH Article 31.

Article 33 further requires suppliers of articles to communicate information on substances in articles that are listed on the Candidate List.

Article 33.1 requires that any supplier of an article containing > 0.1 wt% of a substance on the Candidate List shall provide the recipient of the article with sufficient information, available to the supplier, to allow safe use of the article including, as a minimum, the name of that substance. Article 33.2 requires similar information to be provided to consumers upon request.

According to our records no articles supplied by ExxonMobil in EU Member States and/or EEA countries (note 2) contain a Candidate List substance that triggers the obligations under Article 33.1 and 33.2.

Also, to date ExxonMobil has received no such information from suppliers of articles.

Based upon the above and the information currently available, we have no evidence that the above product supplied by ExxonMobil within the EU Member States and EEA countries (note 2) contains any of the substances identified on the Candidate List at levels which would require action under REACH Articles 31 or 33.

NOTES

(1) Article 31 generally requires to provide Safety Data Sheets for substances and mixtures classified as hazardous and for mixtures that are not classified as hazardous under certain disclosure conditions. It also requires additional information for substances identified PBT or vPvB according to Annex XIII or for substances "of equivalent concern" per Article 57(f) that are listed on the Candidate List. It should be noted that no substance has been added by ECHA on the Candidate List on the basis "of equivalent concern" per Article 57(f)

(2) Under Article 31.1(b) for substances as such identified PBT or vPvB or present in a concentration >0.1% in a mixture classified as hazardous or,

Under Article 31.1 (c) for substances as such included in the Candidate List on the basis that the substance is "of equivalent concern" per Article 57(f) or is present >0.1% in a mixture classified as hazardous or

Under Article 31.3 (b) for substances identified PBT or vPvB or included in the Candidate List on the basis that the substance is "of equivalent concern" per Article 57(f) and present >0.1% in a mixture not classified as hazardous.

The information contained above is provided in good faith. No representations or warranties are made as to its completeness or accuracy. ExxonMobil will not be liable for any damages resulting from the use of or reliance on the information.

VALIDITY DATE: This document is valid until the next relevant legislative and/or regulatory change with a maximum of one year as of the date of issue of the statement.
